**Sample Comments | Result Qualifiers:**

L7114103-1 :  
 Based on the EPA primary drinking water standard MCL for total coliforms, a water supply is considered bacteriologically "SAFE" if no Coliform bacteria are detected. To be considered "SAFE" your report should indicate "<1 col/100ml" or "NEG" for the Coliform Test. If your report indicates a positive result "POS" or a value of one (1) or greater, then your supply is "UNSAFE FOR DRINKING" contact your local Health Department.
